

## Calendar of Flood

179. The duration of the Flood. The total was 1 calendar year and 10 days, but the exact number of days cannot be calculated since it is not known what form of calendar Noah used. The broken lines and the numbers in parentheses indicate uncertain periods that are reckoned conjecturally on the basis of a 360-day year (consisting of twelve 30-day months)—a theoretical year not employed in any known calendar
